

## The 'Diamond Prima' Espresso Machine

### **Made in Italy**

Diamond Coffee Equipment has released the Diamond "Prima" espresso machine to further enhance the Diamond Espresso range. This hand crafted espresso machine has been designed in conjunction with Diamond Coffee Equipment and is manufactured in the heart of Espresso "Italy".

### **Renowned features and build quality**

The Prima is manufactured using the most reliable and commonly available parts for ease of service and maintenance. All of these features have been encased in either a stainless steel body for both visual appeal and simplicity when cleaning, or a Matt grey finish which allows the equipment to be branded for the customer.

### **Ease of service = reduced running costs**

Due to the design and assembly of the Prima range of espresso machines, along with the use of the most reliable and readily accessible parts being used in the manufacture of the machine, the Prima is extremely simple to service. With most parts common to other leading espresso machine brands making the machine extremely cost effective to service and maintain over time.

### **Designed to meet the needs in the Australian Market**

Diamond Coffee Equipment worked very closely with the manufacturer of the Prima range of espresso machines to ensure the units were suited for the Australian market.

The specially designed drip tray allows for either standard cup heights, or thanks to the smart but simple design, the ability to use large take away cups can be done by a simple re-positioning of the tray. This simple design feature allows versatility without the need to stock multiple models or parts. The steam taps chosen are one of the most robust available ensuring the taps can handle the Australian markets large milk based coffee needs.
